

VAIBHAV BARNWAL

Greater Noida, India

+91 7052538998 | vaib07052@gmail.com | [GitHub](#) | [LeetCode](#) | [LinkedIn](#)

SUMMARY

B.Tech Computer Science student with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, DBMS, and Software Engineering. Hands-on experience building full-stack web applications and AI/ML projects using Python, Flask, SQL, TensorFlow, and Scikit-Learn. Passionate about solving complex engineering problems, developing scalable software systems, and applying machine learning to real-world applications.

EDUCATION

Noida Institute of Engineering and Technology, Greater Noida	2023 – 2027
B.Tech in Computer Science Engineering (AI & ML)	CGPA: 8.54/10
CBSE Class XII	2022
St Xaviers School	79.2%
CBSE Class X	2020
St Xaviers School	88.5%

SKILLS

Programming Languages: Python, Java, SQL
Web Development: Flask, HTML, CSS, JavaScript, REST APIs
Machine Learning: TensorFlow, Scikit-Learn, Pandas, NumPy
Databases: PostgreSQL, MySQL, MongoDB, SQLAlchemy ORM
Tools & Platforms: Git, GitHub, Postman, Jupyter Notebook, Render, Vercel
Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Concepts: Authentication, API Development, Data Analysis, EDA, Model Training, Software Development Lifecycle

EXPERIENCE

Python Programming Intern	2025
<i>CodSoft (Remote)</i>	
- Developed Python-based solutions involving automation, data processing, and application development. - Applied problem-solving and debugging techniques to improve functionality and reliability of software modules. - Worked with structured datasets using Python libraries for preprocessing and analysis tasks. - Collaborated in project development, documentation, testing, and timely delivery of assigned tasks.	

PROJECTS

Bharat Pay – Full Stack Banking Application
<i>Flask, PostgreSQL, SQLAlchemy ORM, JavaScript, Tailwind CSS</i>
- Built a production-ready banking platform using Flask with modular RESTful APIs, bcrypt authentication, Flask-Login session management, and CSRF protection. - Designed an ACID-compliant PostgreSQL database schema and integrated SQLAlchemy ORM for efficient data management and transaction processing. - Developed multi-role User/Admin functionality including beneficiary management, account operations, receipt generation, and financial analytics dashboards. - Tested API workflows using Postman and diagnosed deployment issues during production deployment on Render with Gunicorn.
Budget Deviation Prediction System
<i>Python, Scikit-Learn, Pandas, NumPy, Matplotlib, TensorFlow</i>
- Performed exploratory data analysis and feature engineering on financial datasets to identify spending patterns and anomalies. - Built and evaluated machine learning models to predict budget deviations using Python and Scikit-Learn. - Processed large datasets through data cleaning, transformation, and validation pipelines. - Generated visual reports and performance metrics to support data-driven decision making.

ACHIEVEMENTS

- Smart India Hackathon (SIH) Grand Finalist:** Selected among top 5 teams nationwide for developing an innovative technology solution under competitive conditions.
- Solved 200+ Data Structures and Algorithms problems on LeetCode and achieved a rating of 1480, demonstrating strong problem-solving and algorithmic skills.
- Built full-stack and AI/ML projects involving Flask, PostgreSQL, TensorFlow, Scikit-Learn, and REST API development.
